What's in the Box

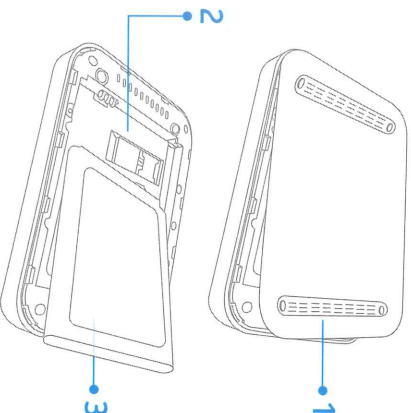

- Battery
- Quick Start Guide
- USB Type C Charger

Replace SIM Card & Install Battery

Replace SIM Card

1. Remove back cover using thumb catch on bottom edge of hotspot.
2. Slide SIM card in SIM card slot with Wireless carrier logo facing up until it goes all the way.

Install Battery

3. Align battery contact with those inside and press gently until battery is seated in place, then close back cover.

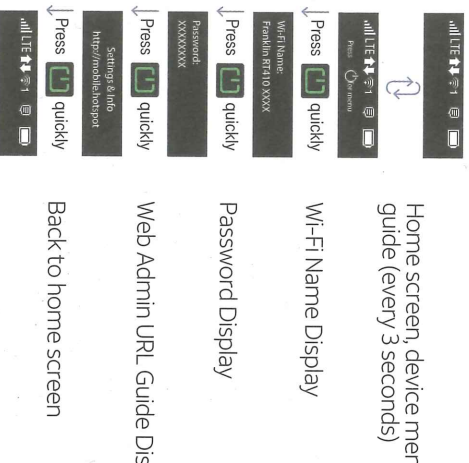

Home Screen

Power up the hotspot

To turn your Hotspot on or off, press and hold the Power Button on bottom side of the device for at least two seconds.

Main Screens

Your Hotspot has a series of screens allowing you view device information and system alerts. Press the Power Button (Navigation Key) to cycle through the following:

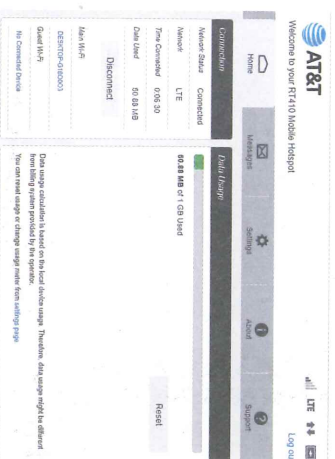

Change WiFi Network Name & Password

Access, monitor, and customize your device settings using the Hotspot Web Admin Page

Log into Hotspot Web Admin Page

1. Open a browser on a computer connected to your Mobile Hotspot.
2. Navigate to <http://mobile.hotspot>
3. Enter your password and click Login. You'll be taken to the Hotspot Web Admin home page.

Note: The default Admin password for logging into the Mobile Hotspot Web Admin Page is 'admin' and must be changed in order to proceed.

Charge the battery

1. Insert small end of the USB cable into USB charging port on right side of hotspot.
2. Plug charging adapter into a standard AC power outlet.

Note: Using a different charger other than the one supplied can result in slower charging times.

Mobile Hotspot
AT&T 101V

started Feb 1, 2017

Reset the Device

You may want or need to clear your account information, reset user settings, or reset your device to its factory default settings.

Reset Wi-Fi settings only

1. Log into Mobile Hotspot Web Admin page.
2. Click the Settings tab.
3. Use drop down menu, select Wi-Fi > Basic.
4. Under Wi-Fi Settings Reset, click Reset.

Restore to factory defaults

1. Turn device on.
2. Remove the battery cover while device is on.
3. Press and hold the Reset button until you see the "Factory Reset Restarting..." message on the device display.
4. When device reboots, all settings will be restored back to factory default settings.

Note: The hotspot must be powered on when pressing reset button and must have sufficient battery level.

Information About Safeguard

We encourage customers to take appropriate measures to secure their devices and invite them to take advantage of the features available on this device to help secure it from theft and/or other unauthorized access and use. This device has a locking function (e.g., user-defined codes or patterns) that can serve as a first line of defense against unauthorized use or access to stored information. Lost or stolen devices should be immediately reported to your wireless carrier so proper measures can be taken to protect accounts. For additional information, visit your wireless carrier's Privacy Policy.

Help

User Guide

Login to the Mobile Hotspot Web Admin page and click Support on the top menu. User Guide is available to download PDF version.

Updates

Device is designed to download latest firmware automatically at power on stage. Users can manually check the latest firmware version by going to Mobile Hotspot Web Admin Page > Settings > Device > Software Update > Check for New Software.

Approved Firmware Versions

This device will only operate with firmware versions approved for use by your wireless carrier and the device manufacturer. If unauthorized firmware is placed device it will not function.
